SUMMARY

Gameplay and AI Programmer with hands-on experience in Unreal Engine 5 and C++. Passionate about building robust, scalable, and well-architected systems. Experienced with Gameplay Ability System (GAS), Behavior Trees, EQS. Enjoy working closely with designers and artists to bring mechanics to life.

SKILLS

Languages: C++, C#, Python
Engines: Unreal Engine 5 (C++ & Blueprints), Unity
UE Systems: GAS, Behavior Trees, EQS, Navigation System, Enhanced Input
Tools: Git / GitHub, Rider, Visual Studio

EXPERIENCE

- 11/2025 – Present
Volunteer

Gameplay Programmer
• Implementation of gameplay mechanics in C++ and Blueprints for *FATAL: Unleashed Darkness* (Unreal Engine 5).
• Integration of character systems and abilities into the project's pipeline.
• Collaborative work within a small, multidisciplinary indie team.
Unreal Engine 5 / C++ / Blueprints

Selene Games
- 2/2024 – 5/2024
Internship

Gameplay Programmer
• Developed a VR minigame in UE5, including Blueprint optimisation to improve runtime performance on virtual reality hardware.
• Contributed to a horror/escape room game in UE5: gameplay logic, interaction mechanics, and level scripting.
• Built a 2D minigame in Unity as part of a rapid-prototyping sprint.
Unreal Engine 5 / Blueprints / Unity

MindTrips

PROJECTS

- UE5 | C++

AI / Combat System Prototype (Work in Progress)
• Modular C++ gameplay framework with a scalable, component-oriented architecture.
• Active integration of Gameplay Ability System (GAS): attributes, gameplay effects, and ability management.
• AI pipeline built with Behavior Trees, EQS, and Navigation System for reactive enemy behaviours.
- UE5 | Blueprints

Into the Deep: An Underwater Exploration Simulator
• Final degree project: player controls an underwater robot in an open ocean environment.
• Resource and energy management systems, plus a sonar mechanic to reveal points of interest.
- UE5 | Blueprints

4Trouble (Game Jam)
• Simultaneous control of four characters, each with a unique ability (jump, special boxes, speed boost, water crossing).
• Cooperative puzzle design built under game jam constraints.

CERTIFICATIONS

- 4/2026 – Present

Unreal Engine 5 – Gameplay Ability System – Top Down RPG
Stephen Ulibarri
- 7/2025 – 9/2025

Professional Game Development in C++ and Unreal Engine
Tom Looman
- 6/2024 – 8/2024

Programming Blueprints in Unreal Engine from Beginner to Professional
Carlos Coronado

EDUCATION

- 2018 – 2025

Bachelor in Game Design and Development
Focused on programming, design, and development of gameplay systems using Unreal Engine and Unity.

Universitat Jaume I
